OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

March 19, 2013

Ms. Cristina Griffin, Agent For: KIK Pool Additives, Inc.
Delta Analytical Corporation
12510 Prosperity Drive, Suite 160
Silver Spring, Maryland 20904

SUBJECT: NOTIFICATION OF MINOR LABEL CHANGES PER PR NOTICE 98-10
PRODUCT NAME: **Kem-Tek All-In-One Chlorinating Granules**
EPA REGISTRATION NUMBER: **7616-70**
APPLICATION DATE: March 5, 2013
APPLICATION RECEIVED DATE: March 7, 2013

Dear Ms. Griffin:

This acknowledges receipt of your Notification application, submitted under the provisions of FIFRA section 3(c) 7(A) and PR Notice 98-10.

Pesticide Application:

KIK Pool Additives, Inc. is submitting the following Minor Label Changes for **EPA Reg. No. 7616-70:**

On Page Four:

Adding the Minor Marketing Claim: "Value Pack;"

On Page Seven:

Adding Graphic to Warn Against Child Drowning Danger;

On Page Ten:

Corrected typographical error in the Table:
from "Pool Size 12' and Above" to "Pool Size 13' and Above."

General Comments:

Based on the review of the submitted material, the following comments apply. The Notification application is **Acceptable**. A copy of the **accepted** Notification is attached in **Regulatory File Jacket 7616-70** for future reference.

If you have questions or comments with regard to this Agency Letter, the please contact Killian Swift via email at **Swift.Killian@epa.gov** or by telephone at **703-308-6346**. When you are submitting information or data in response to this Agency Letter, please send a copy of this Agency Letter with your response in order to facilitate processing.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Monisha Harris".

Monisha Harris,
EPA Product Manager 32
Regulatory Management Branch II
Antimicrobials Division 7510P

Explanation: Use additional page(s) if necessary. (For section I and Section II.)

Notification per PR Notice 98-10 to make minor label change, add graphic and correct typo.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Section - III

[Free Pool Care Advice 1-800-SOS-POOL • www.kem-tek.com]

FIRST AID: Call a poison control center [(1-800-222-1222)] or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment. **If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth, if possible. **If swallowed:** Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. [First Aid may be in table form]

[In the text "this product" or alternate brand name may be substituted for Kem Tek All-In-One Chlorinating Granules name]
 [[Information in brackets] is optional or instructional; italics in brackets indicate instructions not part of labeling.]

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

Danger: CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

[For containers smaller than 50 pounds use the following:]

Environmental Hazards

This product is toxic to fish and aquatic organisms.

[In accordance with PR notice 95-1, use the following complete Environmental Hazards statement for containers 50 pounds and larger]

Environmental Hazards

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazard

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460° F TO 480° F WITH THE LIBERATION OF HARMFUL GASES.

Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, liberation of hazardous gases and possible generation of fire or explosion.

IN CASE OF FIRE, if possible, isolate container in open air or well-ventilated area. Flood with a large volume of water. [IN CASE OF] CONTAMINATION [OR DECOMPOSITION]: do not reseal container.

[In the text "this product" or alternate brand name may be substituted for Kem Tek All-In-One Chlorinating Granules name]

SHOCK TREATMENT

Shocking / Super Chlorinating Your Pool Water

Shock the pool when:

- An increased number of swimmers are using the pool.
- Chloramines are present in the water and the chlorine is not effectively working.
- The water is cloudy even though a proper chlorine level is maintained.

Shocking must be done periodically to remove waste materials like suntan oils, perspiration, body oils and other organic waste.

SHOCK SCHEDULE

Summer – Once per week Fall – Twice per month Winter – Once per month Spring – Twice per month

KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES Features & Benefits:

Dissolves Quickly / Controls Algae and Bacteria

The best time to shock is early evenings with the pool circulating system in operation. This way the sun will not reduce the effectiveness of the treatment.

[READ ALL PRECAUTIONARY STATEMENTS BEFORE USE]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[Use one or more of the following sets of directions]

[Pool Use:] ATTENTION: Never mix this concentrated chemical with any other substance except generous amounts of water. See CHEMICAL HAZARDS on this label. The use of KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES also requires the one time use of KEM TEK™ STABILIZER CONDITIONER as described in the directions below under Start Up. This two-component system results in a longer-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

[Spa Use:] ATTENTION: Never mix this concentrated chemical with any other substance except generous amounts of water. See CHEMICAL HAZARDS on this label.

VINYL-LINED POOL CARE: Vinyl-lined pools are easily damaged by chemicals used to treat and maintain pools. KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES are well suited for use in these pools, especially the above-ground pools which have 3-4 foot depths and are not equipped with a bottom drain. KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES dissolves quickly and completely (is easily pre-dissolved in a bucket of water to help avoid potential problems), so direct contact with the pool liner is reduced and there are not residues to be swept or vacuumed from the pool bottom. KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES also simplifies pH control because it's pH neutral, compared to other forms of chlorinating products which contain calcium hypochlorite, sodium hypochlorite, and trichloroisocyanuric acid (NOTE: Insoluble crystal-forming reaction will result when using sodium bisulfate (dry pool acid) to adjust pH when used in conjunction with calcium hypochlorite). KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES will not cloud water even when super chlorinating which often occurs with calcium hypochlorite products.

[In the text "this product" or alternate brand name may be substituted for Kem Tek All-In-One Chlorinating Granules name]

[[Information in brackets] is optional or instructional; italics in brackets indicate instructions not part of labeling.]

[Pool Use:] START UP: Step 1. Condition pool water with KEM TEK™ STABILIZER CONDITIONER as per directions on its label. Thereafter, regular use of KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES alone will maintain proper stabilization. NOTE: Omit Step 1 if pool is already conditioned with a similar stabilizer. Step 2. Concurrently with Step 1, super chlorinate water by adding 10 oz. [12 oz. or 16 oz.] of KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES per 8000 gallons [10,000 gallons {for 12 oz.} or 13,000 gallons {for 16 oz.}] of pool water. See additional super chlorination instructions below.

DAILY CARE: After Step 1 and 2 above, regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine. NOTE: One ounce of this product per 5,000 gallons of pool water will increase an existing chlorine residual by 0.8 ppm (1/8 rounded measuring cup = 1 oz.). Broadcast KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES directly into the pool water. pH: Keep pH of water between 7.2 and 7.6. Use KEM TEK™ pH MINUS (dry acid) to lower pH and KEM TEK™ pH PLUS (soda ash) to raise it.

SUPER CHLORINATION: Whenever the pool water loses its sparkle or turns green or the chlorine residual falls rapidly after regular chlorination, super chlorinate. Experience shows that during summer months, water will need to be super chlorinated with 10 oz. [12 oz. or 16 oz.] of KEM TEK™ ALL-IN-ONE CHLORINATING GRANULES per 8000 gallons [10,000 gallons {for 12 oz.} or 13,000 gallons {for 16 oz.}] of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm.

[GENERAL:] The following tables are a handy reference to average chlorine requirements, but must not be substituted for regular use of a test kit since pools and conditions vary considerably. Test water frequently and chlorinate as needed. Anticipate an increased chlorine consumption with increased swimming, hot water or weather, rain, a dirty or neglected pool, etc.

[TYPICAL DAILY DOSAGE (SUMMERTIME)] [After Steps 1 & 2 above]

ABOVE GROUND POOL - 3' to 4' Deep						IN GROUND POOL - 7' to 9' DEEP					
Pool Diameter	12 Ft.	15 Ft.	18 Ft.	20 Ft.	24 Ft.	Pool Size Feet	14x28	16x32	17x34	18x36	20x40
Approx Gallons	2,500	4,500	7,000	9,000	13,000	Approx Gallons	15,000	20,000	25,000	30,000	35,000
Dosage Ounces	1	2	3	4	5	Dosage Ounces	6	7	8	9	10

[Spa Use:] FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS:

1. Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. After bathing super chlorinate to 5.0 ppm (1 level tablespoon [or tsp.] per 500 gallons of water). Use a chlorine stabilizer especially for outdoors, to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with KEM TEK™ pH PLUS or KEM TEK™ pH MINUS.
2. This product does not affect pH or alkalinity of water. One tenth oz. (1/2 tsp. [or teaspoon]) per 500 gal. of water gives 0.8 ppm and 1 level Tbs.[or tablespoon] gives 5 ppm of chlorine. To use, broadcast granules into water with jets running. Do not use the spa until the chlorine residual has dropped to 3 ppm.
3. With bathers in a 500 gal. spa, a 2.0 ppm chlorine residual can drop below the minimum 1.0 ppm in 15-20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1.0 ppm.
4. Weekly, super chlorinate water to 5 or 6 ppm (see 2 above). Re-entry into spas is prohibited above levels of 3 ppm of chlorine. Drain and clean spa whenever the water becomes difficult to manage or chlorine stabilizer goes over 100 ppm as measured with a suitable cyanuric acid test kit. Avoid use of products such as body lotion that consume chlorine.

[Reader's Note: Throughout this label, product names for other similar products (i.e., pH adjusters, stabilizers, chlorinators etc.) may be substituted as appropriate.]

STORAGE AND DISPOSAL

STORAGE: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. **CONTAINER DISPOSAL: IF EMPTY:** Nonrefillable container. Do not reuse or refill this container. Place in trash [collection] or offer for recycling if available. **IF PARTLY FILLED:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

[The following will be part of the Above Ground Pool [Start Up] [Maintenance] Kit's instructions]

STEPS FOR USING ABOVE GROUND POOL [START UP] [MAINTENANCE] KIT:

Pool Care: The Importance of Testing

Without proper testing a pool can quickly become cloudy, develop undesirable odors and even become unsafe to use. Testing is used to guide you in the treating of water. With proper testing this Start-Up Kit provides all the essentials to properly maintain your pool. Additional Kem Tek Products [or insert other brand name] are available to correct problems should they occur.

Chlorine: Chlorine breaks down due to many factors - swimmers, water temperature, and sunlight. In order to prevent growths, a chlorine level of 1-3 ppm must be maintained daily. Super chlorinate (shock) using the [insert ABN for EPA Reg. No. 7616-70] to start-up and establish a chlorine level as well at least once per week to remove any chlorine resistant problems. Use the test strips provided or any other reliable test kit to properly chlorinate the pool water. Use [insert ABN for EPA Reg. No. 7616-70] [and/or insert ABN for EPA Reg. No. 7616-76] to maintain daily chlorination (see below).

pH: pH is always present in water. Keep between 7.2 and 7.6 to make water comfortable for use. In addition, the other products used in pool care operate best in this range. pH control is a process of increasing it when it gets below 7.2 with Kem Tek pH Plus* or lowering it when it gets above 7.6 with Kem Tek pH Minus* to keep it in the ideal range. If pool pH is low, stop use of pool until pH is adjusted above 7.0.

(Start-Up):

Test pH and adjust to 7.2 – 7.6 if necessary. Then super chlorinate (shock) by following the dosage on the chart for your pool size. Once chlorine level is established and between 1-3 ppm, proceed with Daily Chlorination. Do not use the pool until the chlorine residual has dropped to 3 ppm.

[When Kit Contains EPA Reg. No. 7616-70]

Chlorination (daily):

For [insert ABN for EPA Reg. No. 7616-70] follow the dosage on the chart for your pool size. Treat pool every evening. For pools with above average use, treat mid-day and in the evening by adding the maintenance dose.

[and/or]

[When Kit Contains EPA Reg. No. 7616-76]

Chlorination (daily):

Add enough [insert ABN for EPA Reg. No. 7616-76] to fill dispenser half way. DO NOT FILL DISPENSER COMPLETELY. Adjust dispenser to a mid-setting. Place dispenser in pool water with chemical release openings facing down. Hold dispenser until it floats properly and upright. Test chlorine level periodically. Chlorine level must be maintained between 1-3 ppm at all times. Adjust floater setting to increase or decrease chlorine output. Do not use the pool until the chlorine residual has dropped to 3 ppm.

Weekly:

Super chlorinate in the evening and when heavy use or rain occurs. If water becomes cloudy or algae starts to grow, triple this dose to correct the problem. Run pump 4 to 8 hours minimum after addition of [insert ABN for EPA Reg. No. 7616-70].

pH Adjustment:

Keep between 7.2 and 7.6. When the pH goes above 7.6 add Kem Tek pH Minus* and if it is below 7.2 add Kem Tek pH Plus*. Use chart for dosage. Run pump and check after 2-4 hours. The dose on the chart is only an estimate. Repeat as needed until the pH is corrected. Use a half dose when nearing the correct pH level.

Algaecide:

The chlorine used to prevent growths in pool water is rapidly consumed by weather conditions and pool use. The addition of Algaecide* helps prevent algae from getting started during periods when the chlorine is below 1 ppm. Add [an] Algaecide* [, such as Kem Tek Pool & Spa Care Algaecide & Clarifier*] at least once a month for prevention. Treat weekly for busy pools or hot summer weather. Whenever an algae growth occurs follow the instructions for super chlorination then add algaecide 24 hours after chlorination and chlorinate pool to 3 ppm if needed.

[In the text "this product" or alternate brand name may be substituted for Kem Tek All-In-One Chlorinating Granules name]

[[Information in brackets] is optional or instructional; italics in brackets indicate instructions not part of labeling.]

Maintaining Your Pool:

Your pool can be kept clean and trouble free by following these instructions. In order for the chemical treatments to be effective the filter system must also be kept clean and in good working order. Hot weather and heavy swimmer load create the need for more chemical treatment and also require that the pump is run more often or for longer periods of time. Run the pump every night after adding chlorine to properly treat the water. In hot weather and with heavy use, due to the size of the pump/filter systems on small above ground pools, circulate 24hrs. per day. Also after every major storm or above normal use shocking the pool must be done to prevent problems.

[Reader's Note: Throughout this label, product names for other similar products (i.e., pH adjusters, stabilizers, chlorinators etc.) may be substituted as appropriate.]
